Creative problem solving and decision making

Date: 10 August 2010, Tuesday
Speaker: Vincent Hor
Venue: CIMA Malaysia Division

Introduction

Whether as an individual or an organisation, we confront daily challenges and issues. It is important to identify the problems appropriately. So that it will lead to the appropriate thinking required to solve the issues. Problem identification and creativity are all about looking at the various perspectives, and being daring enough to do things differently and effectively.

Course objectives

This one day programme is designed for participants to:

- define and use the appropriate and practical problem identification tools, and
- use and practise relevant thinking techniques for problem solving and continuous improvement.

How will you benefit

- You will be able to identify and analyse problems effectively.
- You will use creativity as a learning skill.
- You will be involved in continuous learning and positive self-development.

Highlights of course contents

- Creative problem solving model
- Components of creativity
- Exploring the brain and mind
- Problem identification tools
- Creative thinking techniques and practical application

Methodology

Lectures, group discussion, games, project presentations, debriefing and fun activities.

Who should attend

All professionals striving for better results through more effective problem identification methods and creative thinking skills should attend this workshop.
